OFFICE OF  
RESEARCH AND DEVELOPMENT

Mr. V. A. Anikeyev  
Chief Engineer  
Main Administration on  
Development and Design  
of Gas Cleaning and Particulate  
Control Equipment,  
Ministry of Chemical & Petroleum  
Machine Building  
Moscow, USSR

Dear Mr. Anikeyev:

This letter in accordance with the Protocol of the 2nd Working Group Meeting contains composition of the US delegations to the USSR for the year 1974 as well as the proposed schedule for their travel. In order to realize maximum efficiency from our delegation and to avoid multiple trips for some members, we propose on two of the trips to send two groups simultaneously. These groups would function separately, with their Soviet counterparts but would be under the lead of one delegate head. The US specialists in the area of particulate control technology and in the area of clean fuels, total number 14 individuals, would arrive together and the proposed date for their travel is September 15 through 29, 1974. The second delegation would be made up of flue gas desulfurization, and air pollutions control technology from ferrous metallurgy specialists, total number 13 individuals, and the proposed dates for their visit are October 6 through 19, 1974. The names of the individuals making up two groups will be forwarded later.

We would like to make a suggestion that the visit of Soviet experts in the area of fuel oil demetallization to the United States which is planned for the 3rd quarter of 1974, take place as early as possible since some of the American specialists in that area will travel to the Soviet Union in September.

Regarding the US cement industry's response to the USSR proposal for cooperation in the area of air pollution control technology in that field, we will advise you as soon as we have heard from the individuals in the cement industry.

We are looking forward to receiving the Soviet delegation of flue gas desulfurization experts in June 1974.

Waiting to hear from you.

Sincerely yours,
